Table of Contents

1. Executive overview

1.1 PTD Overview

1.2 PTD Concept

1.3 PTD Metaverse

1.4 PTD Purpose

2. Architecture and Ecosystem overview

3. The PORTAL'D Token (PTD)

4. NFT Marketplace Platform

5. System Based Live Metaverse

6. Economy

7. Tokenomics PTD COIN

8.1 Rewards and fees

8.2 Tokenomics

8.3 Pancakeswap

8.3 Wallet to 3D NFT Marketplace

8.3 Cross-Chain Transfer Solution

8. PTD Technology

9. UNITY Engine & Photogrammetry

10. Multiple Players

11. Scope and Mode of PTD Generation

12.1 Games, plots of land in game

12.2 Game Content Distribution Methods

12. Creatures

14. Road Map

Our Mission

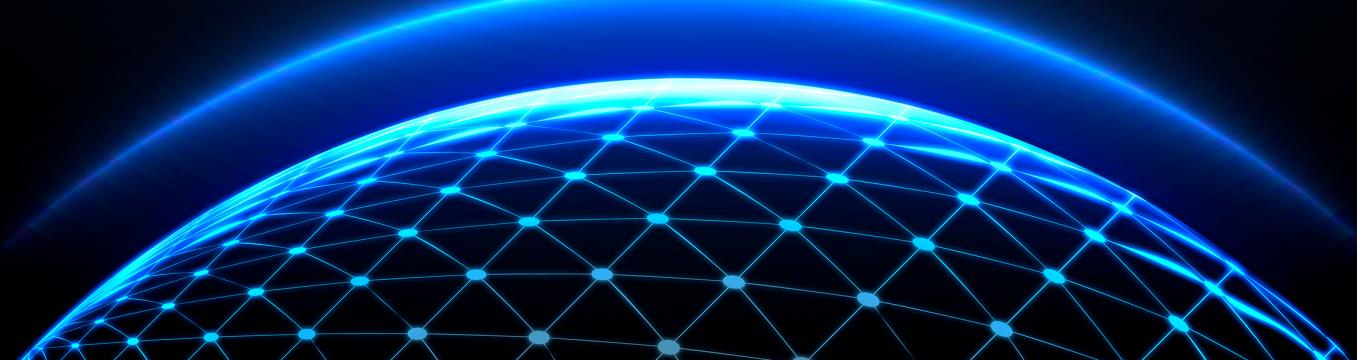

PTD-----PTDCoin-----PTD TECH

Our Vision

Portal'd will become an everyday part of the metaverse. The gap created with the actual and the digital World. is next generation tech will converse and connect entrepreneurs artists, Gamers, and others in never before seen ways

Our initial goal is to bring in 1M active 3D crypto lovers to enjoy the Web3.0 technology and the metaverse innovations involved with our Robust tokenomic, and our Portal'd ecosystem that Visualize the PTD token.

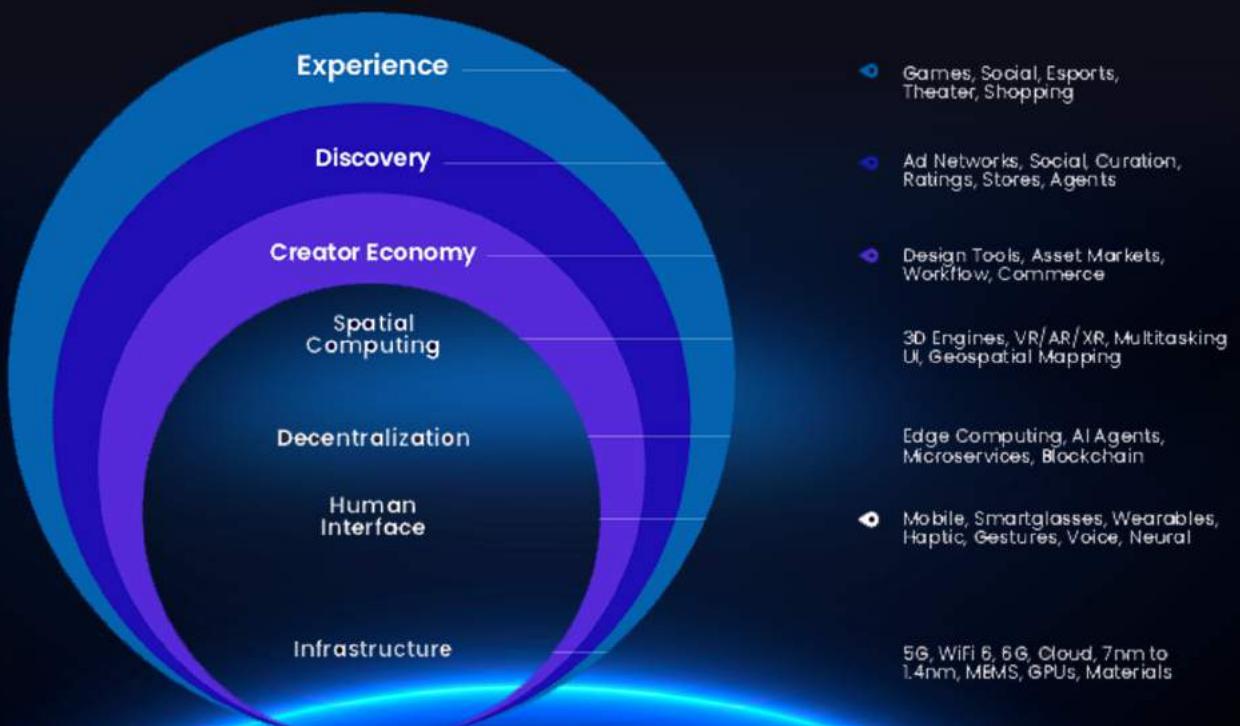

Our NFT's is a revolutionary idea on its own. It gives everyone in the globe the opportunity to view artistic works and allows treasures to be eternally digitized. It also enable artists art collectors, also museums a way of making extra revenue easily

The Metaverse

Seven Layers of The Metaverse Portal'd

Metaverse and Blockchain

The utilization of blockchain adds other dimensions to the Metaverse saga:

1. It makes objects stored on block-chain virtual. The decentralized character of the blockchain with its copies stored on millions of private machines around the world means there will always be a copy of the FT somewhere. Blockchain is more resilient than cloud or server datacenters.

2. Metaverse provides another source of revenue. NFTs- (non-fungible tokens) are not only certificates of ownership and authentication of digital art and collectibles. They are also smart contracts that allow their creators to collect royalties from the future usage of their avatars, art, or other 3D models. By introducing the PTD token, we are creating a complete settlement ecosystem

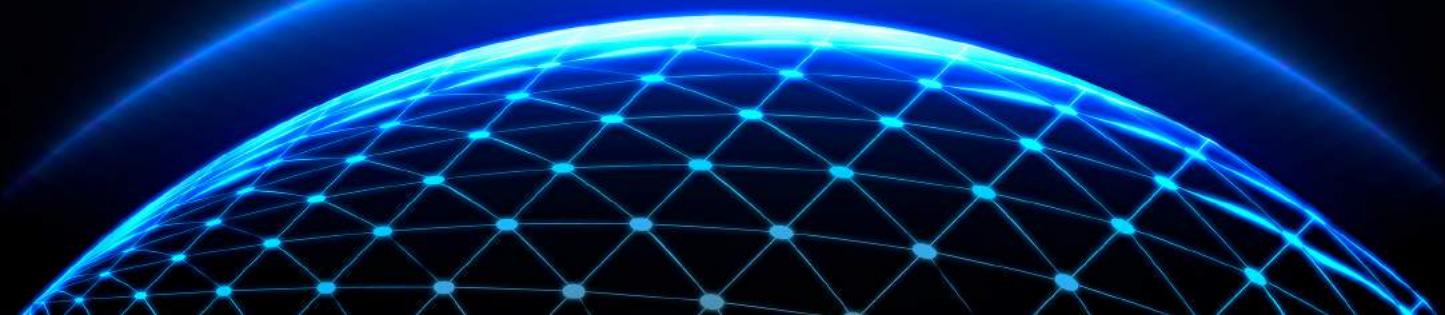

System Of Dynamic Fees and Rewards

The PTD Coin smart contract can apply a custom fee on all transactions (buys/sells/transfer). Some parts of it could be automatically distributed to active players, landlords, and farmers in PTD Metaverse or will be automatically added to the liquidity pool.

That means the number of tokens in holders' wallets could increase as They play, trade, and own tokens in the PTD Metaverse. Based on This setup, the liquidity pool will continuously increase as well, which leads to a higher price floor of PTD COIN. This way impermanent loss is avoided altogether, and in effect, holders get paid for just playing and interacting in the PTD metaverse and can use PTD COIN for the daily in-game business.

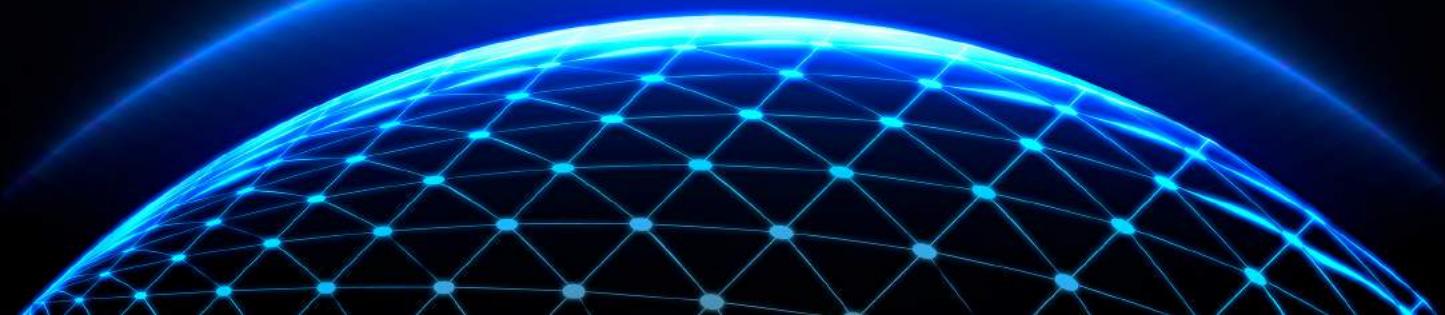

Smart Contracts

Smart contracts is Written in the Solidity language. At the moment, the project BEP-20 and ERC-20 protocol and the PTD Contracts

- Solidity:
 - Smart contracts:

The cryptocurrency protocol is served on multiple blockchains, which allows a blockchain to be used to trade across different protocols and . PTD COIN can be used on all platforms.

The Portal'd Token (PTD)

Portal'd was developed within the blockchain environment and ecosystem of BNB Binance chain official Coin and also ERC20

Ensuring buyers have a total control of there PTD coins we deploy this to enable easy spending

PORTAL'D's official Token is PTDcoins this is shall serve as the main source of payments and will be use to transact within the ecosystem

Deflation: PTDcoin is a characterized token with a 6% fees added to every transactions

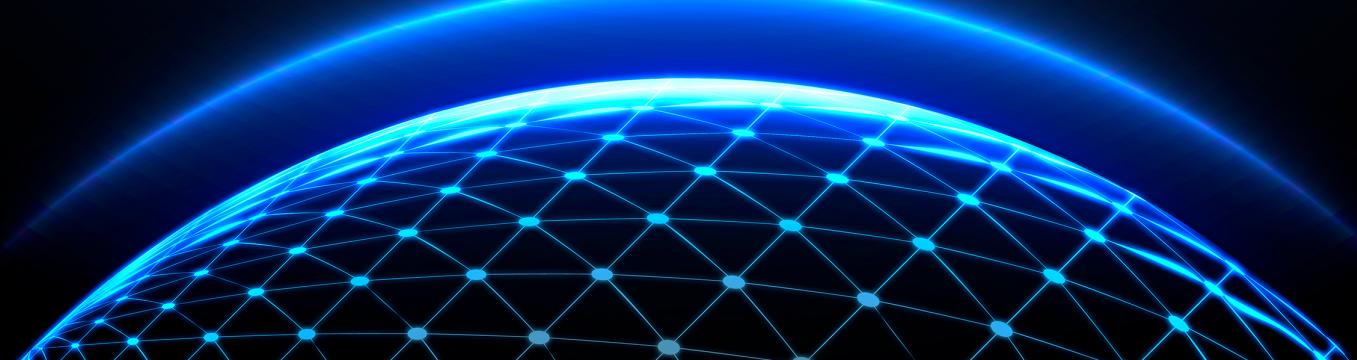

Staking: 0-4%/0.1% of each transaction is proportionally shared within all buyers as a big reward.

Burn: 3% of transactions are burned, ensuring an decreasing supply of PTD

Liquidity: 0-8% of each payments is automatically added to liquidity on Pancakeswap and Uniswap to help liquidity and swapping

The liquidity is permanently locked; however, the token has a built-in function that can release part of the liquidity to buyback & burn (described below)

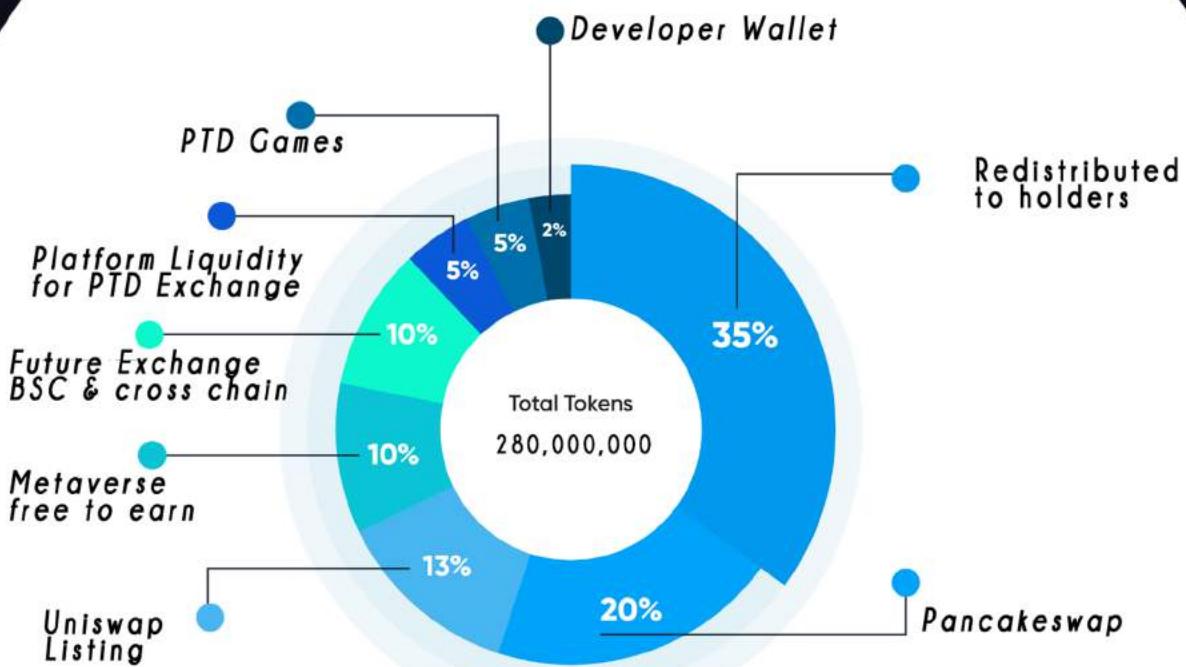

Utility: The PTD token will be the token to be used within the Portal'd ecosystem That includes transacting on the NFT Marketplace and future places

TOKENOMICS

Each stage of the project development and associated tokenomics settings will be explained to the community in advance.

List of EVM Compatible Blockchain

Ethereum is the biggest and most used blockchain network with smart contract-based applications.

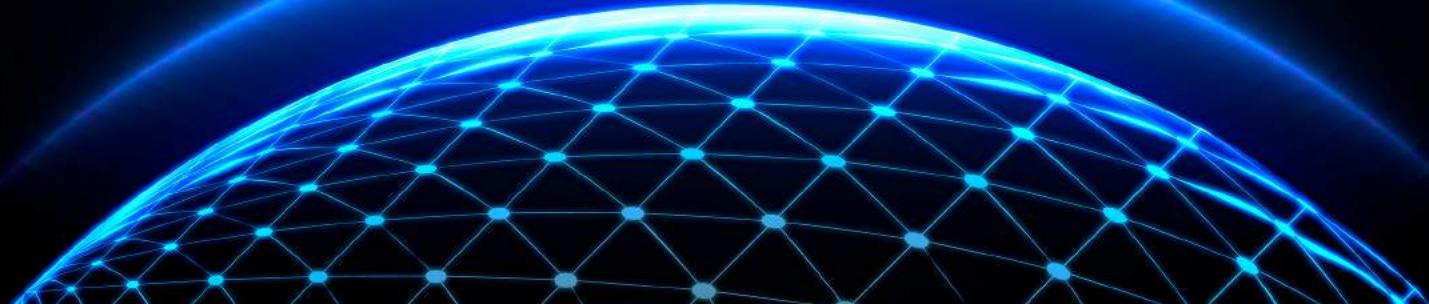

Binance Smart Chain (BSC) is a blockchain network built for running smart contract-based applications.

The POA Network is an Ethereum-based platform that offers an open-source framework for smart contracts.

TomoChain is a scalable blockchain-powered via Proof-of-Stake Voting consensus and is used commercially by companies globally.

Celo is a proof of stake blockchain. Deutsche Telekom delegates (also known as 'staking'*) its CELO on validator nodes operated by its subsidiary T-Systems MMS.

Blockchain	Binance Smart Chain	Ethereum	Celo	TomoChain
Smart Contract	PTD	ETH PTD	Celo PTD	TomoChain PTD
Programming Language	Solidity 0.8.15	Solidity 0.8.15	Solidity 0.8.15	Solidity 0.8.15
Total Supply (Initial State)	300,000,000	300,000,000	300,000,000	300,000,000
Allocated Token on Exchange Wallet	0	300,000,000	300,000,000	300,000,000

Improvements Additional PTD Features

Disclaimer

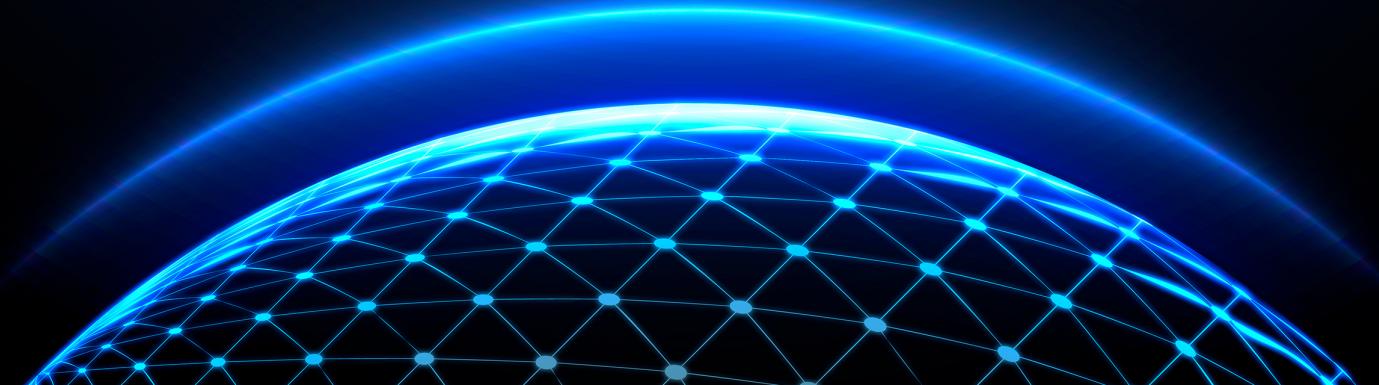

Participating in an ICO Involved is a high risk activity PTD offer is created for experienced professionals that knows Blockchain technologies, cryptocurrency trading and other financial instruments such as stocks or forex.

By participating in this ICO, the user should accept the risks involved and potential financial losses. The participant agrees that he/she is aware of the legal uncertainty market studies are hereby adviced to be studied before proceeding

Anyone who buys PTD tokens acknowledges the project's technological and economic uncertainty described in this White Paper

The purchase of a PTD token allows you to use the developed Portal'd services.
